THIRSTYCAT FOUNTAINS

Description

TICA Endorsement of Excellence Recipient

Thirstycat Fountains provide a safe solution to getting felines to drink water. Their fountains are the only handmade ceramic glazed drinking fountains in the world and come in a variety of styles to match your cat's temperament and physical characteristics. Drinking a healthy amount of water is vital to a cat's well-being however, as most pet owners know, getting a cat to drink out of their water bowl can be quite challenging. Cats are attracted to moving water due to their natural instincts. In the wild, stagnant water means bacteria. As a result, cats tend to love running faucets.
