RE: Update on 2001 Yearbook

It has been almost one calendar year since the Board of Directors accepted my proposal. It has been a very busy year! I am pleased to report that the Yearbook is laid out completely, and pictures are being placed within the Regional pages. One article is being written about showing household pets. TICA’s Best Cat’s artwork has been received and the accompanying article is being written. The Breed and Color section of the book is all but complete. I have had to add a signature to the Yearbook due to increased advertisements in direct response to the early bird prices (prior to July 1, 2001). I believe the Membership has confidence in my abilities and are risking their monies by advertising again in the Yearbook.

In addition to yearbook sales, advertisements, and breeder’s listings, I have also been able to sell some past Yearbooks! Furthermore, Amy Liebold, who has been a most valuable Assistant Editor (and my only liaison to the previous editor!), will have a table at the Annual to promote the sale of the volumes we have in stock. Leslie Bowers has the particulars on this.

Last September, it was understood that this first year, my deadline would not be December 1, but two months later, as I was four months late getting started. I believe you would have been right on target if I had not had consultation rights with the past editor. Alas, she has not been too forthcoming with her consulting. She has logged only two (2) hours of consultation in almost one calendar year! If I had not had the help of Amy Liebold, I would not be able to report to you now that I will not need the two extra months. Georgia Morgan can give you more detail, if you need it, on this matter.

Indeed, I have about 60% of the book complete and sections should be ready for proofing in about 6 weeks.

I feel confident that I will meet the December 1 deadline, thus having the 2001 Yearbook to the Membership during the first two weeks of February 2002. That is just about six months after the Annual. Perhaps, at the Semi, you will all be able to actually be looking at your Yearbooks!!! Thank you for having the confidence in me to do this job, and for giving me the opportunity to provide TICA with a quality Yearbook.

I remain, sincerely,

John Harrison
TICA Yearbook Editor
Volume 22, Numbers 1-3

Production Cost: $20,951.49
Total Income: $3,805.90
Total Cost: $17,145.59

Last year, TICA members voted to remove show results from the TICA Trend to prevent an increase in membership dues to pay for the increased cost of publishing and mailing show results. It is too soon to provide a clear idea of the savings from removing show results at this time:

Volume 22, Number 1: Show results were published because the ballot results were not known in time to remove them. This Trend was 64 pages; the same Trend last year was 56 pages.

Volume 22, Number 2: The Semi-Annual Board Minutes were unusually long due to 17 additional pages of newly rewritten Breed Standards. I also test-published five pages with the Top 300 Cats, Kittens, Alters, Household Pets, and Household Pet Kittens from the then current Standings to see if the membership wanted those published regularly. The response from the TICA email list was clear: They only want to see the final standings. This Trend was 60 pages; the same Trend last year was 56 pages.

Volume 22, Number 3: The final Trend covered by this report was 36 pages compared to the 56 pages contained in the same Trend of the previous year.

I'm asking the Board's permission to publish each year's final standings in the October/November Trend. This will require five additional pages for the top 300 Cats, Kittens, Alters, Household Pets, and Household Pet Kittens or eight additional pages for the top 500 in each category.

Starting with each October/November Trend, the Trend's cover cats are the Cat, Kitten, Alter, Household Pet and Household Pet Kitten of the Year and then a collage of the Best Cats in our non-North American Regions of Asia, Europe North, Europe South and South America. We will now be featuring a collage of the Best Cats of the eight remaining regions on the outside back cover (Cat of the Year is already a cover cat). TICA already pays for full color processing on the cover so there will be no additional cost to do this. This will allow us to feature more of our award winning cats. It also allows me to move the mailing addresses to the outside back cover, making the cover much more attractive. This will still leave four outside back covers to feature each upcoming Annual show.

Yours,
Cathy Welch
TICA Trend Editor

**CATEGORY:** Traditional.

**DIVISION:** Tabby.

**COLOR:** Brown Spotted Tabby.

### HEAD:

- **Shape and Size:** Medium to large inverted wide pear; slightly rounded (convex) look.
- **Ears:** Medium in height, wide, deep base. Set as much on side as on top of head, with slight outward tilt. Top of ear rounded with lynx tips preferred. Paler thumb prints on back of ears.
- **Eyes:** Medium-sized, soft triangle. The heavy hooded bushy brow is one side of the triangle; the almost straight line downward on the inside corner of the eye (closest to the nose break), is the second side of the triangle and the bottom line of the eye, which slants upward toward the ear, is the third side of the triangle. Deep set, one eye-width apart, it is common for the Pixiebob to appear to be half asleep, gazing through partially closed eyes. Appearance of heavy fur above eye (brow). Eye makeup, there must be a band of cream or white directly surrounding the eye. Mascara must follow the corner of the eye downwards to the cheeks. Gold to brown color preferred, Gooseberry Green accepted.
- **Chin:** Well-developed, fleshy with coarse fuzzy fur, In alignment with the tip of the nose, depth of chin obvious.
- **Muzzle:** Full broad muzzle with definite break, and depth. Fleshy whisker pads. **NOTE:** Description of Nose/Muzzle/Chin - Soft-sided diamond from bridge of nose to chin.
- **Nose:** Wide, slightly convex, with large nose leather. Brick in color. Slight nose bump.
- **Profile:** Slightly rounded forehead to eye ridge, slight concave curve from eye ridge to bridge of nose. **NOTE:** Nose/Muzzle/Chin are very important to the overall look of the Pixiebob and equal 15 points.

### BODY:

- **Torso:** Substantial and rangy, but with great depth. Medium to large in size. Females are proportionately smaller than males. Prominent shoulder blades producing a rolling gait. The back is not level, dip behind shoulder, upward slope slightly toward hips. Hips are medium width, prominent, slightly higher than shoulders with a long sloping croup to tail. The flank is deep and powerful, the chest is broad well-developed. Primordial belly pouch on both males and females.
- **Legs:** Long with heavy boning and muscular.
- **Feet:** Large, long and wide, almost round, with big knuckles and fleshy toes. Polydactyl allowed, seven toes maximum. Leg and wrist must be straight when viewed from the front. All toes must rest on the floor pointing forward. Foot must appear sound.
- **Tail:** Articulated tail is desirable, however, kinks and curls are acceptable. Minimum of 2 inches in length, (approximately thumb length). Maximum to the hock, when hind leg is fully extended. Bone length determines the length of the tail. When relaxed, tail should be carried low.
- **Musculature:** Heavy muscular build.
- **Boning:** Heavy, dense boning.

### COAT/COLOR/PATTERN:

- **Length (PB):** Short coat must stand up off the body. Dense belly hair is always longer than the rest of the coat.
- **Length (PL):** Medium, under 2 inches. Semi-dense, belly hair is always longer than rest of coat.
- **Texture (PB):** Soft and wooly, having loft. Is resilient to the touch.
- **Texture (PL):** Soft, lying closer to the body than shorthair.

**NOTE:** For both coats, facial hair is full and brushy in appearance, having a downward growth pattern. Appearance of heavy fur above eyes. Coat separates easily and is weather resistant.

**MISCELLANEOUS:** Seasonal coat changes effect, color, length and depth in short and longhair varieties. Hot weather reduces all but the ground color, which is intensified, in summer season. Winter season will give coat a Frosted appearance.
PATTERN: Small spots with or without rosettes, (broken mackerel pattern allowed) greatly muted by heavy ticking. Random spotting preferred. Belly must be spotted. In the summer time, the pattern is more easily seen than in the winter, when it is muted out. Pattern is secondary to type.

COLOR: Light to medium shades of brown spotted tabby with warm/reddish tones preferred, broken mackerel (muted) spotting accepted. The agouti hair must have several bands of color. Wild hare appearance has a mandatory mouse base coat with reversed ticking having the lightest band at the top and ending in a darker band near the skin. Medium to dark brown bands for the spotting. Light bands at the tips of each hair giving a frosted appearance to the coat, heavier in the winter. Chin to belly to inner legs should be off white to creamy color with mouse gray base. Pale or light color belly to neck. Paw pads to the hocks, must be dark brown/black. End of tail should be dark brown/black. Coat Color is secondary to type.

GENERAL DESCRIPTION: The goal of the Pixiebob breeding program is to create a domestic cat with a visual similarity to the North American Bobcat. This wild look does not reflect the true nature of the cat, which is loving, trustworthy, and tractable. The Pixiebob comes in the shorthair and longhair varieties. The Pixiebob has an inverted pear-shaped head, heavily hooded eyes, strong muzzle and chin. Strong heavy muscular body with substantial boning, like the North American Bobcat. Females are proportionately smaller than the males.

ALLOWANCES: Polydactyl; seven toes maximum.

WITHHOLD ALL AWARDS: Lack of substantial boning/musculature, (fine boning). Any color/pattern not described in the standard. Lack of ticking or pattern throughout coat. A ruff around the neck (longhairs). Tail bone shorter than tip of thumb to first knuckle, (approximately 1 inch), and full length tail. Round eyes.

Temperament must be unchallenging; any sign of definite challenge shall disqualify. The cat may exhibit fear, seek to flee, or generally complain aloud but may not threaten to harm.

Evidence of intent to deceive the judge by artificial means, cats with all or part of their tail missing (except those breeds whose standard calls for this feature), totally blind cats, cats having more or less than five toes on each front foot and four on each back foot (unless proved to be the result of an injury or as authorized by a Board approved standard), male cats in the adult championship class which do not have two descended testicles, and, at the discretion of the judge, tail faults (visible or invisible) and/or crossed eyes shall be disqualified from championship competition.

See Show Rules, ARTICLE SIXTEEN for comprehensive rules governing penalties/disqualifications applying to all breeds.

  Texture: Resilient, all weather.
  Pattern/Color: All patterns and colors allowed.

  Balance: Muscular and well-proportioned. Tail not too short or overly long as to affect the natural balance of the cat. Excellence in one aspect is not to offset deficiency in another.
  Condition: Overall impression should be that of an alert, active and athletic cat in superb condition.

GENERAL DESCRIPTION: The American Bobtail is a medium to large, naturally occurring short-tailed cat which is a product of natural selection. It is a hearty breed that has all the intelligence and skill that nature demands of her creatures. The American Bobtail displays the look of an athletic animal, well-muscled and solid, with the appearance of power. The breed should also be noted for an exceptional disposition and adaptability.

ALLOWANCE: Although straight tails are ideal, tail may be slightly knotted or kinked and also may be curled or hooked at the end, as long as the tail remains flexible where attached to the body. Breed slow to mature, 2-3 years. Jowling in older males
