Board Governance for Winter Meetings:
✓ Review and accept prior year’s audit report
✓ Mid-year budget review
✓ Review mid-year indicator reports
✓ Adopt new budget for next year
✓ Report on progress of goals
✓ Proposals which require no membership vote
Legislative Committee Report

Jay Bangle – Committee Chair

Jan. 2009 Board Meeting

To date, we have a new liaison for the NE region, and are working with potential liaisons in MA & SC regions. We need a replacement liaison MP. We only have one liaison outside North America. The following are regional reports, in order of importance of the problems in the region.

Northeast Region
Potential problems are arising in ME, MA, VT and CT. The new liaison is coming up to speed and is doing well.

Northwest Region
A Savannah escape and subsequent recapture has brought the issue of hybrid-derived breeds to the attention of AK Fish & Wildlife. They have perfunctorily ruled that ALL cats with ANY non-domestic ancestors are illegal. This includes SV, BG and CU. I am working with people in AK, the NW liaison and RD, to plan strategies to fight this threat to TICA registered cats in AK.

South Central Region
Cheryl and Kelly are working with a potential replacement for Kelly. Adverse legislation has passed Dallas. Lubbock is facing similar threat. Austin has antagonistic laws on the books. All these cities have or are facing ordinances based on California’s AB 1634 – draconian breeder licensing, fees and mandatory spay/neuter.

Great Lakes Region
Iowa legislation to permit hybrid cat breeds is being worked on and we hope to have it introduced and passed this year.

The KY bill introduced by HSUS that will give it 2 additional seats on the Animal Control Advisory board for the state, seems to have died a quiet death.

Michigan proposed breeder licensing law that would have been devastating has been pulled.

Chicago is contemplating MSN very similar to CA AB 1634. This fight is ongoing.

Southwest Region
Local threats are being addressed. Santa Barbara County has a commission that is looking in to AB 1634 like regulations. The committee is heavily unbalanced towards
AB 1634 proponents, and reports of railroading other committee members have surfaced. Los Angeles continues to be a problem.

Mid Atlantic Region
Potential problems exist in PA, NJ, VA, WV and DC. We have a potential liaison identified. I have been in contact with CFA’s liaison in DC.

Southeast Region
Repeated negative laws in Durham NC have been proposed. We are working with various other clubs (like NCRAOA) to defeat them.

Mid-Pacific
A new liaison needs to be found to replace me on the committee. No other issues at this time.

The Future
We continue to work with CFA and other organizations regarding negative cat legislation, and animal legislation in general. Some high points have been working with NCRAOA (North Carolina Responsible Animal Owners Alliance).

In Service to TICA, respectfully submitted,

Jay Bangle

109.1 Annual Convention.

109.1.1 Annual Convention. Labor Day weekend each year is reserved for the Annual Convention. No other shows may be held the weekend of the Annual Convention with the following exception. A club may receive permission to hold a show on the Annual weekend upon application to the Board. Application must state specific reasons for the request for exemption and why such a show would have no impact on the Annual.

109.1.1.2 Proposals to host the Annual Convention in the designated region must be received for the Annual Meeting 3 years prior to the proposed convention.

109.1.1.3 In the event no club submits an acceptable proposal, any club in any region may submit a proposal to host the Annual Convention by the agenda deadline for the Semi-Annual Meeting 2½ years prior to the convention and a notice soliciting such proposals shall be published in the TICA TREND.

109.1.1.4 The subsequent designated order of rotation will remain the same.

109.2 Meetings of the Board.

109.2.1 All Board Meetings shall be scheduled for a minimum of 2 days.

109.2.1.1 Meetings of the Board shall be the fourth full weekend in January (Winter Meeting), the third full weekend in May (Spring Meeting) and the week immediately preceding Labor Day weekend (TICA Annual).

109.2.1.2 The Winter Meeting shall be held in Harlingen TX without a show OR at a location outside the United States in conjunction with a show, approved by the Board.

109.2.1.3 The Spring Meeting shall be held in the United States, rotating from Central to West to East, with or without a show. The meeting venue must be at or near a major international airport at a hotel with adequate meeting space, full restaurant service and airport shuttle.

109.2.1.4 The Winter and Spring meeting locations shall be selected by the Board without consideration of accompanying show.

109.2.1.5 Minutes of all meetings of the Board of Directors shall be completed within 10 working days following the meeting.

## Recommended Re-Alignment of Europe

### Europe West
- ENGLAND
- IRELAND
- NORTHERN IRELAND
- ICELAND
- SCOTLAND
- WALES

### Europe North
- BELGIUM
- BELORUSSIA
- CHANNEL ISLANDS
- DENMARK
- ESTONIA
- FINLAND
- GERMANY
- LATVIA
- LIECHTENSTEIN
- LITHUANIA
- LUXEMBOURG
- NETHERLANDS
- NORWAY
- POLAND
- SWEDEN
- RUSSIA
- UKRAINE

### Europe South
- ALBANIA
- AUSTRIA
- BULGARIA
- CORSICA
- CROATIA
- CZECH REPUBLIC
- CZECHOSLOVAKIA
- FRANCE
- GIBRALTAR
- GREECE
- GUADELOUPE
- HUNGARY
- ISRAEL
- ITALY
- MALTA
- MARTINIQUE
- MONACO
- PORTUGAL
- ROMANIA
- SERBIA
- SLOVAKIA
- SLOVENIA
- SPAIN
- SWITZERLAND
- TURKEY

## Re-Alignment of South America
Remove Costa Rica from SC and move to SA. Add Panama, El Salvador and all countries south of Mexico to South America - this move only affects 3 members in Costa Rica - and a bit more than $200 in revenue.

Add Standing Rule 307.6.1

Standards for Breeds with non-domestic species hybrids
Breeds that are based on a non-domestic ancestor should have a statement at the beginning of the standard listing the species used and stating that other non-domestic breeds are not acceptable for outcrossing. Those breeds currently affected are the Savannah, the Bengal, and the Chausie.

Comments from Rules:
FY: I suggested it so that it will be easily seen by anyone who might not trouble to look it up in the Registration Rules. The same for any of the breeds using a wild species. And it would be good if the standard stated clearly that only the Serval is permitted as the wild ancestor. I understand that there have been problems in some of the breeds using wild species with using more than one wild species.
Advancement of Transfer New Breeds to Championship

Transfer to ANB

Add:

3.5.3 Part Three outlines the requirements for advancement of breeds recognized by other World Cat Congress members at Championship level but currently at Registration Only or Preliminary New Breed status in TICA.

33.10 Advancement of Transfer Championship Breeds to ANB

33.10.1 Breeds which are at Championship status elsewhere in the cat fancy and already accepted for Registration Only or for at Preliminary New Breed status in TICA, may apply to advance directly to Advanced New Breed status upon satisfying the requirements outlined below.

33.10.1.1 At least one year has passed since the breed was accepted for Registration Only status in TICA
33.10.1.2 The breed has been at Championship status for a minimum of 5 years in at least 2 full member associations affiliated with the World Cat Congress
33.10.1.3 A minimum of 10 cats of the breed have been registered in TICA during the 12 months preceding the application.
33.10.1.4 Submission of an electronic Application for Acceptance as an Advanced New Breed to each member of the Genetics Committee and each member of the Rules Committee at least 90 days prior to the board meeting at which approval is sought. Any proposed modifications to a previously approved standard must be submitted with the application. Following approval of proposal by the Genetics Committee and Rules Committee, the application must be submitted to the TICA Executive Office at least 60 days prior to the Board Meeting for inclusion in the agenda. Any comments of the Genetics Committee or Rules Committee must be included. The application must include the following: (applications available from the TICA Executive Office or at ticaeo.com).
   33.10.1.4.1 A letter of intent to apply for approval as an Advanced New Breed, signed by at least five TICA members in good standing;
   33.10.1.4.2 A proposed breed standard, approved by the Genetics and Rules Committees, including any permissible outcrosses.
   33.10.1.4.3 An indication that the breed is to be categorized as an Established Breed, a Natural Breed, a Mutation Breed or a Hybrid Breed and the rationale for the proposed category. (See RR 37.1.2).
   33.10.1.4.4 A proposed Working Group Chair for the breed
   33.10.1.4.5 A processing fee of $50
33.10.1.5 A Notice of Intent to Apply for Advancement to Advanced New Breed Class Status must be published in the TICA TREND at least 120 days prior to the meeting at which the application for advancement will be heard, and which invites comments about the breed to be forwarded to the Executive Office.
33.10.1.6 Make a formal presentation at the meeting of the Board of Directors, including photographs, illustrations, statistics, health and breeding reports, representatives of the breed and any other relevant material

33.10.2 Upon acceptance by the Board as an Advanced New Breed, the Transfer Championship Breed shall follow the requirements for competition, exhibition and advancement to Championship as outlined in 33.7.3 and 33.8 of these Rules.

33.10.3 The Board of Directors may approve, disapprove or impose additional requirements on the Breed, including, but not limited to, appointing a different Working Group Chair and requiring changes to the standard and/or breed name, or any other modification which the Board of Directors, entirely in their discretion, may require.
Transfer to Championship

ADD:
33.11 Advancement of Transfer Championship Breeds to Championship in TICA

33.11.1 Transfer Championship Breeds which are at Advanced New Breed status in TICA, may apply to advance to Championship status upon satisfying the requirements outlined below.

33.11.1.1 At least one year has passed since the breed could be shown in the Advanced New Breed class in TICA
33.11.1.2 At least 10 individual examples of the breed have been shown as Advanced New Breed in TICA shows
33.11.1.3 At least 5 litters of the breed have been registered during the previous year in TICA
33.11.1.4 At least 10 TICA members in good standing are actively breeding and/or exhibiting the breed.
33.11.1.5 At least 10 cats of the breed have been registered in the year prior to the application
33.11.1.6 Submission of an electronic Application for Acceptance as an Advanced New Breed to each member of the Genetics Committee and each member of the Rules Committee at least 90 days prior to the board meeting at which approval is sought. Any proposed modifications to a previously approved standard must be submitted with the application. Following approval of proposal by the Genetics Committee and Rules Committee, the application must be submitted to the TICA Executive Office at least 60 days prior to the Board Meeting for inclusion in the agenda. Any comments of the Genetics Committee or Rules Committee must be included. The application must include the following: (applications available from the TICA Executive Office or at ticaeo.com).
33.11.1.7.4 A letter of intent to apply for approval as Championship Breed, signed by at least 10 TICA members in good standing;
33.11.1.8 7-2 A proposed Breed Committee Chair for the breed
33.11.1.9 7-3 A processing fee of $50
33.11.1.10 7-4 Evidence that the requirements listed in 33.11.1.2 to 33.11.1.5 have been met

33.11.1.11 8 A Notice of Intent to Apply for Advancement to Championship Status must be published in the TICA TREND at least 120 days prior to the Annual meeting at which the application for advancement will be heard, and which invites comments about the breed to be forwarded to the Executive Office.
33.11.1.12 9 Make a formal presentation at the Annual meeting of the Board of Directors, including photographs, illustrations, statistics, health and breeding reports, and any other relevant material. At least two cats of the breed must be present during the presentation.

33.11.2 The Board of Directors may approve, disapprove or impose additional requirements on the Breed, including, but not limited to, appointing a different Breed Committee Chair and requiring changes to the standard and/or breed name, or any other modification which the Board of Directors, entirely in their discretion, may require.

Amend:
33.10.2 to read AUpon acceptance by the Board as an Advanced New Breed, the Transfer Championship Breed shall follow the requirements for competition, exhibition and advancement to Championship as outlined in 33.7.3 and 33.11 of these Rules.@
Amend Standing Rules 303.4

Current SR 303.4  AAdvancements from Registration Only to Preliminary New Breed, from Preliminary New Breed to Advanced New Breed, from Advanced New Breed to Championship or from New Traits to Championship shall take effect on May 1 of the ensuing year”

Amend SR 303.4  AAny breed advancements will take effect only at the start of the next show year (1 May).@  

Rules Notes:
At the 2008 Annual the Board directed Rules Committee to identify a streamlined process to enable established breeds recognized elsewhere at Championship level to progress to Championship within TICA.

These proposals provide a means for these breeds to reach championship status in TICA without having to follow the New Breed program in its entirety, but at the same time aims to balance that against the need to ensure that the breed(s) will be viable outside of the original foundation region(s).

The aim was to provide feedback in time for a Board Ballot that (if approved) would permit these rule changes to go forward on the October 2008 ballot. Proposal 1 was submitted for a Board Ballot in October 2008 but was denied. Some Board members were sympathetic but wanted to discuss the proposals.

Rules therefore resubmits these proposals Aas-is@ for discussion at the Winter 2009 meeting. A list of potentially impacted breeds is supplied at the end of the proposals.

(LS) There are so many issues to deal with that concern me with a "one sized fits all" approach like this. For example, what happens to breeds that need to be in a breed group we already have? (i.e. the Asians?). It is not possible for ANY breed to be automatically stuck somewhere in our system and I think that it will result in a larger issue.

While I am not opposed to a streamlined system for breeds that have been around a long time elsewhere in the world, I especially do not consider a 5-year-old breed to be an "established" breed in any sense; I would much prefer a minimum of a 10 year requirement.

(BT) I can live with either 5 years or 10 years......the Board always has the choice of saying no if they feel the breed needs longer in ANB or more exposure and direct the breed to do whatever they feel is lacking.
Supplemental Information Breeds Impacted

The Registration Only breeds listed in the Standing Rules which Rules think are potentially impacted by this change are: Asian Group (includes the Mandalay - NZCF breed name for Asian Selfs)

- Asian Longhair (Tiffanie)
- Asian Shorthair
- Burmilla LH
- Burmilla SH
- Australian Mist
- European Shorthair
- German Rex

In addition, existing PNB breeds are Kurilian Bobtails, Sokoke and Thai

The Asian group is the one breed group which Rules had the most concern over. (Registration status among WCC members is believed to be as follows:

NZCF -(New Zealand) - Mandalay (equivalent to Asian Selfs) B Championship status in the 1980s

CCCA (Australia) B Championship in 2007 for Asian Selfs in black, blue, chocolate & lilac. The Black Self is known as Bombay and is bred to US Bombay type, the other colors are bred to the UK Asian standard.

In addition, LOOF recognizes all Asian varieties at Championship status (date unknown)

The Burmillas definitely are impacted as they have been recognized by GCCF and FIFe at Championship level since 1997 (GCCF) and 1994 (FIFe B silver varieties of Burmilla only)

Australian Mists are recognized by the Australian registries in late 90s, WCF since 2004 and NZCF since 1999. Hence they are definitely impacted.

European Shorthair - recognized in FIFe since mid 90s, not sure who else recognizes it but it is not listed as a WCF breed on the WCF site.

German Rex is recognized by FIFe and we believe by WCF. It is a very obscure breed and unlikely to have significant numbers wishing to join TICA. NOTE: It is the same gene as the Cornish Rex. Only difference is type.

Our PNB breeds are also impacted - depending on who recognizes them for Championship (and when that was),

Sokokes have been Championship status in FIFe for at least 7 years, but we don't believe that anyone else recognizes them at Championship level.

Kurilians have been recognized at Championship by WCF since the mid 90s and with FIFe since Jan 2004.

The Thai has not yet been accepted under any name by any major international cat association or by any major registry in North America or the United Kingdom. However, the Thai breed was recognized by the World Cat Federation (WCF) in continental Europe in 1990. Therefore the breed is unlikely to be impacted by the proposed rules.
Amend Show Rule 210.9

Current Rule 210.9
210.9 When transporting a cat through the show hall, an exhibitor shall carry
the cat in one or both hands or in a carrier.

Amend Show Rule 210.9 to read:
Any time a cat is out of its cage, whether for grooming, transporting to or from a ring or for any other
reason, the cat must be secured in one or both hands or in a carrier.

Comments:
(BT) What about all of the cats that lay in the grooming space during the show? I agree with transporting but
not sure I agree with any time out of the cage as I'm not sure this can ( or should be ) policed.

(LS) I think that cats laying in grooming spaces by themselves (without a hand on them) is a particularly bad
idea. It's not so much that cat as it is cats walking by, etc (just like the issues that occur with cats on a leash
in the show hall). As far as "policing" goes, it's impossible to police most things; the point is that if someone
is violating a rule, it is on that person if there is a problem, not the people that are being responsible.
Add Show Rule 210.13

210.13 No exhibitor shall spray, pour or otherwise introduce any liquid or aerosol substance into a judging cage except the official cage cleaning solution in use in that ring, or at the judge=s specific direction.

Comments:
(AR): Several times I have had sick headaches after breathing fumes from something an exhibitor sprayed into my judging cage.
(MW) Some combinations of chemicals produce harmful side-effects. This rule will help to prevent this happening.
(BT) The sprays don't bother me - I'm not sure we need this rule.
Discussions – Show Rule Changes

Top 15 format B

The Board has asked for direction on the matter of top 15. Here is what I've come up with based on previous discussions. Remember this is simply a preliminary 'progress report'. (By Dorothy Lewis)

212.4.5 Top 15 Format - 75 or More Cats Present:

When 75 or more kittens, cats, alters, household pets or household pet kittens are present in a class, the judge shall award Best through Fifteenth Best final awards.

(optional) add to Rule 212.2, rosettes: Cats awarded Eleventh through Fifteenth Best are not required to be presented in the ring, and may be awarded a certificate or any other award in lieu of a rosette.

Housekeeping: If passed, 212.4.4 (currently 212.6) should read Top 10 Format - 25 to 74 Cats Present and the text of that item should read "When 25 to 74 cats."

There has been some positive discussion that if this is passed, the points awarded for finals should be increased by 50 points. Thus a Best All Breed would be worth 250 points and a Best Specialty would be worth 200 points. Part of the reasoning on this is that a 15th Best Specialty cat (rare but not impossible) would receive only 10 points for the win. This point increase would obviously apply to all finals regardless of Top Five, Top Ten (including 6th - 9th options) or Top 15.

There has also been discussion of whether to change the number of points required for titles if the change is made to 250/200. A general opinion has been that almost any cat can acquire the needed points if they show long enough from simply their color/division awards and that what really counts is the number of finals earned. Therefore there is likely no real necessity for making a change here. Points for color and division would remain unchanged. Leaving the points the same also makes this change simpler. If the required points were to change, it would require >rules= for what to do with cats who are in transition. That is: my cat is a double grand; how many points do I now need to go to triple? Would these cats grandfather to their top title using the old system? Or would they change to the new system mid-stream? Or even more difficult, would they receive a new point total based proportionately on how much they would have earned under the new system and move on from there.

A decision will need to be made on scoring. Currently >drop-down= is used when there are fewer than 10 cats present. Should this remain with the points starting at tenth place for the last position (see standing rule 601.2.4.1), or should it be changed to starting at 15th place? There needs to be some discussion on this point. For reference this rule reads as follows: AThe scoring system starts at tenth place final points for the last position in the final when there are fewer than 10 cats, kittens, alters, household pets or household pet kittens competing.@
42.3 A longhair/shorthair specialty applicant shall have bred and/or acquired as a kitten (5 months of age or younger) and shown to TICA Grand Champion status a minimum of two whole cats in the applicant's breed specialty and one cat of opposite coat length/body type (may be an alter). The cat of opposite coat length/type must be owned or leased by the applicant and must reside with the applicant.

42.3.1 At least one whole cat bred and/or acquired by the applicant as a kitten (5 months of age or younger), shall be shown to Supreme Grand Champion status.

42.3.1 Applicants applying under the requirements of 42.2.5.2 must have shown to TICA Grand Champion or Grand Champion Alter five cats from both the longhair and shorthair breeds, with no fewer than three from one coat length/body type and the remaining from the opposite coat length/body type. One Supreme Grand Champion or Supreme Grand Champion Alter and Regional Winner must be in the opposite coat length/body type from the primary coat length/body type.

42.3.1.3.5 One of the four must be a cat of opposite body type and coat length. Selection of the breed of cat of opposite body type and coat length must be approved by the Judging Administrator.

Amend to read:

42.3 A longhair/shorthair specialty applicant shall have bred and/or acquired as a kitten (5 months of age or younger) and shown to TICA Grand Champion status a minimum of two whole cats in the applicant's breed specialty and one cat of opposite coat length/body type (may be an alter). The cat of opposite coat length/type must be owned or leased by the applicant and must reside with the applicant.

42.3.1 Applicants applying under the requirements of 42.2.5.2 must have shown to TICA Grand Champion or Grand Champion Alter five cats from both the longhair and shorthair breeds, with no fewer than three from one coat length/body type and the remaining from the opposite coat length/body type. One Supreme Grand Champion or Supreme Grand Champion Alter and Regional Winner must be in the opposite coat length/body type from the primary coat length/body type.

42.3.1.3.5 One of the four must be a cat of opposite body type and coat length. Selection of the breed of cat of opposite body type and coat length must be approved by the Judging Administrator.
Current Wording:

42.3.1 At least one whole cat bred and/or acquired by the applicant as a kitten (5 months of age or younger), shall be shown to Supreme Grand Champion status.

42.3.1 Applicants applying under the requirements of 42.2.5.2 must have shown to TICA Grand Champion or Grand Champion Alter five cats from both the longhair and shorthair breeds, with no fewer than three from one coat length/body type and the remaining from the opposite coat length/body type. One Supreme Grand Champion or Supreme Grand Champion Alter and Regional Winner must be in the opposite coat length/body type from the primary coat length/body type.

Amend to read:

42.3.1 For Breeders. Prior to application, must:

42.3.1.1 Have bred a minimum of five TICA registered litters. *At least five of these litters must be born in the applicant's house and must remain there until the kittens are 12 weeks of age.*

Comments from Rules:

LS comments: There are many reasons that I can think of that this rule change will be, in fact, severely detrimental to a litter of kittens including the following:

1. Kittens would not be allowed to visit a vet if necessary

2. At times breeding queens do not cooperate with the timing of their births, especially when people are also traveling and showing. This rule would prohibit depositing a queen that was due (or with newborns) with a vet or another breeder during the time just before delivery and/or during the very high risk time of shortly after birth (or even with young kittens -- I personally do not leave such cats or litters alone in my house, even with a pet sitter checking daily)

3. Kittens would not be able to have their first vaccinations at the appropriate time in areas which require vets to administer all vaccines.
Amend Standing Rule 901.4.2.2 and 901.4.2.5
Lifetime Achievement Awards

The following changes will need to be made for Lifetime Achievement Awards with the change to Top 25 International Awards:

901.4.2.2 Eligibility: All eligible cats must have received at least one Top 25 (was 20) International award as a kitten, cat or alter and two International or Regional top 20 awards as a kitten, cat or alter. (Example: A regional top 20 kitten and top 20 cat in 1998 and a top 25 (was 20) international alter in 1999 would make the cat eligible for this title.) *Remainder of the article unchanged.*

901.4.2.5 There is no time limit for claiming the LA title. You may claim for deceased cats if you choose to do so. (add the following) However, awards for 21st Best through 25th Best International may be claimed only for years in which those awards were actually presented.
(Show Rules, ARTICLE SEVENTEEN)

2017.1 Judges Books. Judges must forward the COVER and the ORIGINAL (white copy) of all pages of the judge=s book to the Executive Office of TICA within 48 hours after the close of the show. Alternately, judges may forward a scanned document containing the cover and all white pages to the Executive Office within 48 hours after the close of the show. The scanned book must be legible and all pages must be included, otherwise the judge=s book will not be considered complete and timely, and the penalties for a late judge=s book assessed. If a scanned book is used in lieu of the original, the judge must retain the original judge=s book until one year after the close of the show season to which that judge=s book relates, and must provide the original judge=s book to the Executive Office within 48 hours after a if requested to do so. The yellow copy of all pages of the judge=s book is to be turned in to the master clerk at the proper time during the show. The judge retains the pink copy of all pages of the judge=s book for his/her personal records. At the completion of the show, the Master Clerk will submit the marked catalog and the yellow copies of the judge=s books to the Club/Show Committee.

Comments:
I think holding the original book until after the show year is scored and awards out is long enough - not sure why we would hold a scanned copy any longer than we hold yellow slips if mailed in. (BT)
GENETICS COMMITTEE REPORT
WINTER MEETING 2009

1. Thai application to ANB
   No objection. Everything is in order.

2. Highlander Standard Change from disqualify to penalize for too short a tail
   No objection. Committee feels the change is smart at this point in time

3. Savannah Standard Changes
   There was some discussion on the terminology used for the shortened tail. Final draft submitted was considered acceptable.

4. Ragdoll Standard Changes
   No objections.

5. Tennessee Rex from Experimental to Registration Only
   Committee would like more information on the inheritance of the gene; however, there is no objection to advancement to Registration Only. The information regarding inheritance can be provided.
   The definition of “satin” needs to include a statement that satin is morphologically different from glitter.

Other comments are:
One of my concerns is that 20% of the breed standard is placed on coat color/pattern - in a breed which allows all colors and patterns. That is A LOT of points.
-Why a slightly weak chin - when they want a moderate length to the muzzle?
-Why is a 3/4 tail acceptable? How could a judge even TELL it is a 3/4 tail? The cat should have a full-length tail in my opinion.
-Under the coat section, they state for Traditional color - but earlier they state "All" in the standard - which do they want?
-I would like to see more info on inheritance.
Heather Roberts
HIGHLANDER BREED GROUP (HG/HD)

The Highlander (HG) is a medium to large shorthair domestic cat. Distinguishing features are its sloping forehead, wide nose blunt profile, and the loose relaxed curl to its wide based ears. The Highlander Longhair (HD) is the long hair version.

Length ............ 4
Texture ............ 4
Pattern ............ 6
Color ............ 6

CATEGORY: All.
DIVISION: Solid, Tortie, Tabby, Silver/Smoke
COLORS: All.

PERMISSIBLE OUTCROSSES:
Domestic longhair/shorthair, not a member of a recognized breed.

HEAD:
Shape: Wide, inverted pear-shaped head with substantial width to muzzle.
Eyes: Medium to large set far apart. Set on a slight bias. Slightly flattened oval in shape. Eye color independent of coat color except in Pointed Category.
Ears: Medium to large, wide at the base, set as much on the top of the head as on the side, as erect as possible. Ears must be firm at the base, flexible at the tips. Loose relaxed curl with little backward direction, allowing the tips of the ears to be clearly visible in a frontal view. Ear furnishings and ear tufts are desired but not required. Kittens may have a greater degree of curl but not more than 90°.
Muzzle: Full, wide, strong with a definite break. Prominent whisker pads should make muzzle appear squared.
Muzzle length makes head appear longer than wide.
Chin: Strong and deep. Must align with top of jaw.
Profile: Rounded back skull, sloping forehead, change of direction at the nose bridge, slight curve to nose. Nose, muzzle and chin form a blunt look in profile.
Nose: Wide with substantial nose leather.

BODY:
Torso: Medium to large in size with noticeable depth. Rectangular in shape. Straight back with hips higher than shoulders. Overall muscled, athletic appearance. Males are proportionally larger than females.
Legs: Medium in length, back legs longer than front.
Feet: Medium to large, rounded with large knuckles. Longhair (HD) must have toe tufts.
Tail: Short and thick. Bone length must be a minimum of 2 inches in adults with proportional length in kittens. Must not extend past the hock. Slight kinks and curls are allowed.
Boning: Moderately heavy and substantial.
Musculature: Well-muscled.

Texture: There will be texture variations depending upon the color of the cat.
(HG) Resilient, snapping back into place.
(HD) Soft.

Pattern:
Spotted: Random pattern preferred. Spots should be well-defined; may be oval, round, squared or triangular in shape.

Classic: Will have spots and swirls distinguishing it from the normal classic pattern.
Pointed: Expression of the underlying tabby pattern is desirable.

OTHER:
Balance: All parts of the body in proportion.
Condition: Should reflect excellent health, good muscle tone.
Temperament: Must be unchallenging.

GENERAL DESCRIPTION:
The Highlander is a muscular, athletic domestic cat. Selective breeding has contributed to protecting the unique features and enhancing the bloodlines. Highlander cats come in both shorthair and longhair. Physical characteristics include a sloping forehead and wide nose, with the nose and muzzle forming a blunt look in profile. The curled ear is seen in profile as a loose, relaxed curl with minimal backward direction. The ears are wide-based, open and stand tall.

LOCKETS: Withhold all awards
ALLOWANCES: Tarnishing in silvers

PENALIZE: Ears that are not open or wide based, ears too small or low set. Tips of ears not visible from frontal view in adults. Kittens with more than 90° curl. Tail too short.
DISQUALIFY: Ears not erect. Tails too long or docked.

Pattern ...........................8
Color .............................4

CATEGORY: Traditional.

DIVISIONS: Solid, Tabby and Silver/Smoke Division.

COLORS: Black, Brown Spotted Tabby, Silver Spotted Tabby and Black Smoke ONLY.

PERMISSIBLE OUTCROSSES: Egyptian Mau, Oriental Shorthair, Ocicat, Domestic Shorthair

HEAD: Shape: The face forms an equilateral triangle. The top of the triangle is the brow line over the eyes; the sides follow down the jaw bone meeting at the chin. The triangle excludes the ears. The head is small in proportion to the body.

Ears: Ears are extremely large and high on the head. They are wide with a deep base, and have rounded tips tops. The inside base of the ears are is set quite close at the top of the head. There are Ear furnishings may be present, that rarely extend beyond the edge of the ear; Light colored; horizontal bars (i.e. ocelli) on the back of the ear pronounced ocelli are desirable.

Eyes: Medium sized and set underneath a slightly hooded brow. The top of the eye resembles a boomerang, which is set at an exact angle so that the corner of the eye slopes down the line of the nose. The bottom half of the eye has an almond shape. The eyes are moderately deep set, low on the forehead, and at least one eye width apart. Tear stain markings are present along and between the eyes and the nose. All eye colors are allowed and are independent of coat color.

Chin: From the frontal view the chin tapers to follow the triangle of the head. In profile, the chin is very shallow without much depth; the angle from the nose to the chin slants back, which may cause the chin to appear shallow.
Muzzle: The muzzle is tapered with no break. It falls within the bottom portion of the facial triangle that runs from the brow to the point of the chin.

Profile: The forehead is a straight to slightly convex curve from the top of the head to the ridge just above the eye, where there is a slight change of direction and a straight to very-slight concave curve from that ridge to the tip of the nose. In profile, the face also forms a triangle from the top of the eye to the tip of the nose, turning to follow the jaw line and back up to the eye.

Nose: Viewing from the front, the nose is wide across the top with low set nostrils. In profile, there is a slight downward turn at the end, giving a rounded appearance. Nose leather is slightly convex, not flat.

Neck: Long and lean.

**BODY:** Torso: A semi-foreign body type with a full deep rib cage, a slight, but not extreme tuck-up, and a rounded rump. The hip and thigh are full and long, and somewhat heavy in proportion to the rest of the body.

Legs: Very long and slender yet strong. Back legs are slightly longer than the front legs, and due to this extreme length, may now and then give a false appearance of being cow-hocked.

Feet: Oval, small to medium, with elongated toes.

Tail: Medium to thick in width. Medium in length, ending between the hock and just above ground level when standing, with preferred length just below the hock. Tail should taper slightly to a blunt end. Whippy tails are not desired.

Boning: Medium boning with density and strength.

Musculature: Firm and well developed yet smooth. Athletic yet not bulky. Lean but not delicate.

**COAT:** Coat: Short to medium in length with good substance and a slightly coarse feel to it. Coarse guard hairs cover a softer undercoat, though the spots have a notably softer texture than the guard hairs texture of the ground color hairs. The coat is not inordinately dense and lies relatively flat against the body. Glitter is not desired.

**COLORS:** Brown (Black) Spotted Tabby, Black Silver Spotted Tabby, Black, Black Smoke ONLY. The only color variations allowed are the gold to orange ground color with bold, solid dark markings; the silver ground color with bold, solid dark markings; solid black and black smoke. No preference is given to ground color on the Brown (Black) Spotted Tabby. Bold solid markings are preferred on all tabbies; ghost markings preferred on solid blacks and a visible pattern on black smokes.

- **BROWN (BLACK) SPOTTED TABBY:** Bold, solid dark markings. No preference is given to ground color.
- **BLACK SILVER SPOTTED TABBY:** Bold, solid dark markings on any silver ground color.
- **BLACK:** Black with ghost markings preferred.
- **BLACK SMOKE:** Black markings with enough contrast to the silver ground color to make the pattern visible.

In any variation the lips are black, as are the prominent black tear duct lines on the inner sides of each eye and the tear duct lines are prominent. On the spotted Savannahs the nose leather can be either brick red, solid black or black with a light red or pink line running down the center. Solid brick red, pink, or black, as well as red or pink surrounded by black. In black Savannahs, the nose leather must be solid black. Paw pads in any color variation should be deep charcoal or brownish black.

**PATTERN:** The spotted Savannah pattern is made up of bold, solid dark brown to black spots, which can be round, oval, or elongated spots. Rosettes are not desired. A series of parallel stripes, from the
back of the head to just over the shoulder blades, fan out slightly over the back and the spotting pattern follows the line of the stripes from the shoulders continuing the length of the body. Vertically aligned spots are not desired. Smaller spots will may be found on the legs and feet, as well as on the face. The black Savannah should be solid black. Black spotting on a black background is the ideal preferred. The spots should conform to the spotted Savannah's description. The smoke pattern will should conform to the spotted Savannah’s description.

**TEMPERAMENT:** The ideal Savannah is confident, alert, curious and friendly.

**GENERAL DESCRIPTION:** The overall impression of the Savannah is a tall lean graceful cat with striking large dark spots and other bold markings, on a luxurious tawny, gold, orange, silver, black or black smoke background color of any shade of brown, silver, black or black smoke. The cat is a replica of the tall, lean, muscular Serval cat of the African plains from which it originated. The Savannah cat is a domestic breed which closely resembles its ancestral source the African Serval, but is smaller in stature. Affectionate and outgoing, with exceptionally long neck, legs, and tall ears, as well as a medium length tail, the Savannah is both unusual and beautiful. The Savannah is also an exceptionally graceful, well-balanced cat with striking color and pattern.

**PENALIZE:** Spots that are any color other than dark brown to black. Any distinct locket on the neck, chest, abdomen or any other area not provided for in the Standard. Vertically aligned spots or Mackerel tabby type stripes. Cobby body. Small ears.

**DISQUALIFY:** Extra toes, a bobbed or mutated any fused, or kinked tail.

Temperament must be unchallenging; any sign of definite challenge shall disqualify. The cat may exhibit fear, seek to flee, or generally complain aloud but may not threaten to harm.

Evidence of intent to deceive the judge by artificial means, cats with all or part of their tail missing (except those breeds whose standard calls for this feature), totally blind cats, cats having more or less than five toes on each front foot and four on each back foot (unless proved to be the result of an injury or as authorized by a Board approved standard), male cats in the adult championship class which do not have two descended testicles, and, at the discretion of the judge, tail faults (visible or invisible) and/or crossed eyes shall be disqualified from championship competition.

PAID IN FULL
Hello Gloria,

I am about to submit an application to move the Thai from PNB to ANB status. As part of that application, I need to pay the $50.00 filing fee. Before I can send the application, I need a copy of the DAR to enclose as proof that we paid the fee.

May I pay the fee via PayPal and then get a copy of the DAR back from you by email tomorrow? If so, to what email address do I send the PayPal payment?

Thanks,

Cristy Bird
Working Chair, Thai Breed
The International Cat Association, Inc.
Advancement to Advanced New Breed

33.6.1 Requirements. A Preliminary New Breed Class Breed may apply for Advanced New Breed upon completion of the following:
33.6.1.1 At least 1 year has passed since the breed was first advanced to Preliminary New Breed Class Breed status.
33.6.1.2 At least 100 cats which have attained the age of 8 months (at the time of application) are registered with TICA; of these, at least fifty (50) must either correspond to requirements for the assigned registration category for Championship or have a registration code such that the offspring could be eligible for Championship.

List of cats registered as Thais, by name and registration number:

121. Magichagoblin Tiramus, SBT 092505
122. Magichagoblin Dion, SBT 100906

Note: The registration numbers of the cats come from the Executive Office, which will not provide the last 3 digits of the numbers to non-owners.

[Requirements for ANB status now continue.]

33.6.1.3 At least 25 litters have been registered with TICA.
33.6.1.4 At least 25 TICA members in good standing, in at least five different regions, are actively breeding the breed.

An active breeder has registered in TICA at least one litter of the breed within the past 2 years. Therefore, we are combining 33.6.1.3 and 33.6.1.4. Below are the active Thai breeders, their TICA membership numbers (which indicate region), and the registration number of a recent litter:

33.3.3 Advancement from Experimental New Breed to Registration Only New Breed. An experimental New Breed may apply for approval of the Board of Directors as a Registration Only Breed upon completion of the following:
33.3.3.1 At least 1 year has passed since the initial registration of the breed in the Experimental Registry.

Date of initial registration of the breed: 4-19-2007

33.3.3.2 At least 10 cats of the breed have been registered in the Experimental Registry.

List cats by name and registration number.

1. ERNEST-TE A1T 071904 0520. Rhinestone Cowboy B2N 042307 068
2. TE-REX A1T 071904 0514. Satin Two Tone B2T 082807 049

33.3.3.3 At least 5 litters of the breed have been registered.

List litter registration numbers below. Attach copies of litter registration certificates.

1. B2N 010107 11
2. B2T 020307 2
3. B2T 082807 JJ
4. B2N 042307 YY
5. In the Office (TICA)

33.3.3.4 At least 3 TICA members in good standing from 2 different regions are on record.

List member, region, and membership number.

1. Franklin Whitmerung R-3959-SE
2. Linda Usher R-3777-SC
3. Bonnie Charvat R-3304-SE
4. 
5. 

33.3.3.5 Submission of an electronic Application for Advancement to Registration Only Breed 90 days prior to the Board Meeting at which recognition is sought to each member of the Genetics Committee and each member of the Rules Committee. Following approval of the application by the Genetics Committee and the Rules Committee, the application will be submitted by the Chair of the Rules Committee to the TICA Executive Office at least 60 days prior to the Board Meeting for inclusion in the agenda. Any comments of the Genetics Committee or Rules Committee must be included. (applications available from the TICA Executive Office or at www.ticaeo.com)
33.3.3.5.1 Application must include the following: (application available from the TICA Executive Office or at www.ticaeo.com)

- A brief description of the breed distinguishing it from other breeds recognized by the Association

Attach to application:

- A proposed breed name that is unique: *Tennessee Rex (T-REX)*
- A proposed two-letter registration code: *TR or TE*
- A proposed breeding program: *ATTACHED*
- A proposed designation of Breed Classification (See RR 33.2) *Mutation Breed*
- A proposed provision Working Group Chair *Franklin Whittenburg*

33.3.4 A Notice of Intent to Apply for Advancement to REGISTRATION ONLY Breed status must be published in the TICA TREND at least 120 days prior to the meeting at which the application for advancement will be heard, and which invites comments about the breed to be forwarded to the Executive Office

Date submitted for publication in the TREND: *9-22-08*

FOR INFORMATION ONLY:

33.3.5 Upon official acceptance by the Board of Directors as a Registration Only Breed, cats will be registered in the Stud Book of Foundation Registry. (See 36.2, 36.3, 36.4, 36.5, and 36.6) The approved two-letter registration prefix will be used (without EX)

33.3.6 It is understood that acceptance for advancement to Registration Only implies only that TICA agrees to provide registration facilities for development of the breed in question. There is no explicit or implied guarantee that TICA will accept the breed for championship either simultaneously or at any time in the future.

Color 5
Pattern 5

CATEGORIES: Traditional
DIVISIONS: Traditional
COLORS: All
PERMISSIBLE OUTCROSSES: Domestic LH/SH, not a member of a recognized breed

Head:
Shape: A modified wedge with gently rounded contours

Ears: Medium to medium large size, broad at base. Set as much on the side of head as on top.

Eyes: Medium-large almond and rounder when alert, moderately wide set.

Chin: slightly weak

Muzzle: Moderate length with muzzle (or whisker break) and prominent whisker pads.

Profile: Stop is a gentle (or moderate) curve. Nose is straight with no bump.

Neck: Short and thick.

BODY

Torso: Semi-cobby, with large, long and rectangular but not slender. Body muscular and athletic. Chest full. Back straight, but higher in the hips.

Legs & Feet: Medium length legs in proportion to body with large, rounded fully rexed paws.

Tail – Wide at base tapering to tip, ¾ to full tail and fully rexed.

Boning: Substantial

Musculature: Firm, athletic.

Coat

Length: LH – Medium long with fully plumed wavy tail.

SH – Medium short with rexed tail.

Rexed Hair - In both hair lengths, the coat will be very curly on neck & jowls with less curl under the chin. Curly hair at base of ears becoming wavy towards hips. Small curls at base of throat becoming long and wavy at flanks. Front portion of legs curly including shoulders, front portion of back legs becoming wavy at britches.

Satin effect- Should shine and have a rich satin appearance. Hair sparkles in light and also intensifies the color of the coat.

Texture: Is soft and should not mat.

Pattern: Traditional

Color: All

General Description: The Tennessee Rex is a naturally occurring mutation that spontaneously appeared in the Tennessee Valley in 2004. It is a medium to large-sized cat, which is curly coated from birth. The coat consists of all types of hair (guard, awn, down) with the guard hairs being soft. The curly hair is most prominent on the neck, shoulders, chest, legs and tail. All types of fur on the Tennessee Rex should shine glisten with a rich satin appearance as well as sparkle when viewed looking across the coat under lights. The satin effect gives the cat the ability to reflect sunlight giving the cat a metallic shine and
sparkle in the sunlight. The hair seems to be fragile on the back feet and will appear to “molt” in that area. The whiskers can be long or short, but will always be slightly or extremely curly, as well as being fragile. As kittens, the fur will “molt” in the temple area between the ear and stomach and will be symmetrical. The temperament is gentle and loving.

LOCKETS: Allowed

ALLOWANCES: “Molting” of coat in kittens.

DISQUALIFY: No satin sparkle on coat.

Tennessee Rex

Satin Hamster
Breed Description

The Tennessee Rex is a naturally occurring mutation that spontaneously appeared in the Tennessee Valley in the summer of 2004. It is a medium to large-sized cat, which is curly coated from birth. It has a semi-cobby type body, with a short and thick neck. The fur on the neck and jowls is very curly, but slightly less, immediately under the chin. The ears are medium to moderately large with slightly rounded tips and wide at the base. The eyes are medium large which are almond shape at rest and rounder when alert. The eyes can be all colors. The nose should be straight with no bump. The chest is full with fully rexed hair extending down the chest to the stomach. The torso is large, long, and rectangular, but not slender, with very curly hair starting at the base of the ears and becoming wavy as it extends toward the hips. The curly hair follows the same pattern on the stomach as on the back, starting small and curly on the chest at the base of the chin and becoming long and wavy at the flanks. The body is muscular and athletic in appearance. The back is straight, but higher in the hips. The legs have very curly hair extending all the way and including the shoulders. The legs are in proportion to the body, with large, rounded paws that are fully rexed. The rear legs are very curly on the front edge, which turn into wavy fur on the britches. The tail is wide at the base and tapering to the tip. The tail is three-quarters to full length and fully rexed. The longhaired Tennessee Rex will have a full plumed tail. The whiskers can be long or short, but will always be slightly or extremely curly. The whiskers can also be fragile.

The coat can be all colors and patterns with eye color being independent of the coat. The coat consists of all types of hair (guard, awn, down) with the guard hairs being soft. The curly hair is most prominent on the neck, shoulders, chest, legs, and tail. The texture of the coat is very soft with a definite satin feel and should not mat. All types of fur on the Tennessee Rex should shine and have a rich satin appearance. The fur sparkles in the light with a rich satin appearance that intensifies the color of the coat. The satin appearance is believed to be part of the Tennessee Rex mutation in the hair shaft as well as the curly hair. The satin effect is caused by sharp geometric shapes on the hair shaft and coated with a reflective coating. The hair seems to be fragile on the back feet and will appear to “molt” in that area. As kittens the fur will “molt” in the stomach and temple area between the ear and eyes and will be symmetrical. The temperament is gentle and loving. The only allowable outcrosses will be domestic shorthair and domestic longhair. The Tennessee Rex appears to be a strong, solid, healthy cat and should make a fine addition to the cat fancy. It is believed that the breed will bring much enjoyment to future generations of Tennesseans and also the rest of the world.

THE INTERNATIONAL CAT ASSOCIATION, INC.
ADVANCEMENT FROM EXPERIMENTAL NEW BREED TO REGISTRATION ONLY NEW BREED

33.3.3.5.1 Application must include the following: (application available from the TICA Executive Office or at www.ticaeo.com)

- A brief description of the breed distinguishing it from other breeds recognized by the Association

Contact Person: Kristen Leedom 862-784-7260, 216-271-1729

Attach to application:

- A proposed breed name that is unique: Elf
- A proposed two-letter registration code: EF
- A proposed breeding program: See attached
- A proposed designation of Breed Classification (See RR 33.2) hybrid
- A proposed provision Working Group Chair: Kristen Leedom

33.3.4 A Notice of Intent to Apply for Advancement to REGISTRATION ONLY Breed status must be published in the TICA TREND at least 120 days prior to the meeting at which the application for advancement will be heard, and which invites comments about the breed to be forwarded to the Executive Office.

Date submitted for publication in the TREND: Aug - Sept

FOR INFORMATION ONLY:

33.3.5 Upon official acceptance by the Board of Directors as a Registration Only Breed, cats will be registered in the Stud Book of Foundation Registry. (See 36.2, 36.3, 36.4, 36.5, and 36.6) The approved two-letter registration prefix will be used (without EX)

33.3.6 It is understood that acceptance for advancement to Registration Only implies only that TICA agrees to provide registration facilities for development of the breed in question. There is no explicit or implied guarantee that TICA will accept the breed for championship either simultaneously or at any time in the future.

SEP 4 2008
33.3.3 Advancement from Experimental New Breed to Registration Only New Breed. An experimental New Breed may apply for approval of the Board of Directors as a Registration Only Breed upon completion of the following:

33.3.3.1 At least 1 year has passed since the initial registration of the breed in the Experimental Registry.

Date of initial registration of the breed: (01-14-07)

33.3.3.2 At least 10 cats of the breed have been registered in the Experimental Registry.

List cats by name and registration number.

1. AOP 010608014
2. AOP 022407041
3. AOP 063007077
4. A2P 112008029
5. A2P 122007011
6. AOP 080707056
7. AOP 080707027
8. A1T 041905009
9. AOP 030707057
10. A2P 040108022

33.3.3.3 At least 5 litters of the breed have been registered.

List litter registration numbers below. Attach copies of litter registration certificates.

1. B3P 123107 M
2. A2P 024068 BB
3. A2P 040108 JS
4. A2P 122007 P
5. AOP 042008 J

33.3.3.4 At least 3 TICA members in good standing from 2 different regions are on record.

List member, region, and membership number.

1. Kathy Leaton R3665-CL Great Lakes (R3665-CL)
2. Nancy Roberson R3665-CL Great Lakes
3. Paulette Soule R3663-CL Great Lakes
4. Janelle Herr R3633-CL Great Lakes
5. Jennifer Herr Pending was sent in North Atlantic Region Submitted 8/10

33.3.3.5 Submission of an electronic Application for Advancement to Registration Only Breed 90 days prior to the Board Meeting at which recognition is sought to each member of the Genetics Committee and each member of the Rules Committee. Following approval of the application by the Genetics Committee and the Rules Committee, the application will be submitted by the Chair of the Rules Committee to the TICA Executive Office at least 60 days prior to the Board Meeting for inclusion in the agenda. Any comments of the Genetics Committee or Rules Committee must be included. (applications available from the TICA Executive Office or at www.ticaeo.com)

SEP 4 2008
Membership Rules

All members are expected to be familiar with and comply with all TICA By-Laws, Registration Rules, Show Rules, and Standing Rules. (Rules are available from the TICA Executive Office or on the TICA website www.TICAEO.com)

13.1 Qualifications. Membership shall be open to any individual person who is interested in owning, breeding or exhibiting domesticated cats. New members must complete the application form which includes an agreement to abide by the rules and regulations of the Association, pay the required fees for membership dues and to have at least one cat or a cat's name registered with TICA. A member's region of record is the region where the member resides.

13.1.1 No more than four persons residing at the same mailing address may be voting members.

13.1.2 TICA clubs may collect and send in dues for club members. Dues must be sent with a list which shall include each club member's name and mailing address. Email address shall be included if available.

13.1.3 Membership cards may be sent only to an individual member's mailing address and not to a club's mailing address. In the case of a lost number, only the member may request confirmation of the number. Confirmation must be mailed to that member's mailing address.

13.2 Classes of Members. Members shall be divided into four classes: Life Members, Regular Members, Family Members and Junior members. A member's region of record is the region where the member resides.

13.2.1 Regular Members: Those members 18 years of age or older who have paid the regular membership fee. Regular members are eligible to vote and to receive all rights, privileges and honors accorded.

13.2.2 Family Members: Additional members of a regular member's family, over the age of 18 years, who pay family membership dues. Family members have the same rights and privileges as regular members. Only one family member per regular member may vote.

13.2.3 International Family Members. Additional members of an International member's family, over the age of 18, who pay international family membership dues. Family members have the same rights and privileges as International members, excluding a TICA TREND subscription. Only one additional family member per International member may vote.

13.2.4 Junior Members: Those members under 18 years of age who pay junior membership dues. Junior members have the same rights and privileges as regular members except the right to vote and hold office.

13.2.5 Life Members: Those members who pay the life membership fee. Life members have the same rights and privileges as regular members.

13.3 Dues.

13.3.1 Membership dues shall be established by the Board of Directors and shall be due and payable on the first of May each year for the ensuing year.

Related Standing Rules:

103.3.1 No matter when in a membership year (i.e. May 1 - April 30) a person joins TICA, he/she must renew that membership on May 1 in accordance with By-Laws 113.1, 113.1.1 and 113.1.2.

103.3.1.1 Memberships paid in April expire on April 30 of the following year.

103.3.1.2 Membership dues are not prorated.

By-Laws regarding Membership Voting state:

113.1 Qualification. Each member in good standing, one whose dues are paid and who has no outstanding indebtedness to TICA or to any TICA club, and who is not/was not on the Temporary Suspension List on the qualifying date, was a member in good standing 6 months prior to the first day of the month in which a ballot is to be mailed, shall be eligible to vote.

113.1.1 Expired memberships not renewed before July 1st shall lapse and may not be renewed retroactively.

113.1.2 Persons whose membership has expired will be considered new members if they renew their membership after June 30.

By-Laws regarding Breed Sections state:

14.1 Breed Sections. A Breed Section shall be established for each breed and one or more sections for household pets. Each member shall automatically be eligible to apply to belong to one Breed Section as a part of his or her membership fee. Any member may belong to additional Breed Sections by applying for and by paying an additional fee.

14.1.1 Any member may belong to additional Breed/Breed Group Sections by applying for and paying an additional fee AND by showing proof of one of the following:

14.1.1.1 Individual registration of a cat of the breed/breed group in the three years immediately preceding application.

14.1.1.2 Registration of a litter of the breed/breed group in the three years immediately preceding application.

14.1.1.3 Showing a kitten, cat, or alter of the breed/breed group in the three years immediately preceding application.

14.1.1.4 Ownership of a kitten, cat or alter of the breed/breed group.

The Elf Cat

The Elf is being developed using foundation cats from Sphynx and American Curl breeds. Each of these two breeds have a single trait that makes them distinct from all other breeds. The Elf combines these traits to create a unique breed of cat that is different from each of the contributing foundation breeds. These two traits are independent of each other and when combined pose no harm to the health and well being of the new breed Elf.

HEAD:

**Shape:** The head is slightly longer than it is wide with prominent cheek bones and a distinctive whisker break with prominent whisker pads. The skull is slightly rounded with a flat plane in front of the ears.

**Eyes:** Shaped as a walnut, oval on top and round on the bottom. Placement should be at a slight angle between base of ear and tip of nose. Wide set with a minimum of one eye width apart. Color should be clear and brilliant with no relation to cat color, except that blue eyes are required on all pointed cats.

**Ears:** The ears are moderately large, wide at the base and open, curving back in a smooth arc when viewed from the front, side, or rear. Curl minimum of 90 degree arc, not to exceed 180 degrees. Firm cartilage from ear base to at least 1/3 height. When viewed from the front, the outer base of the ear should begin at the level of the eye, neither low set nor on top of the head. When Elf’s are alert ears swiveled toward front, line following curve of ear through tips should point to the center base of skull.

**Muzzle and Chin:** Whisker break with prominent whisker pads. Chin is firm, in line with nose and upper lip.

**Profile:** Slight to moderate stop at bridge of nose.

**Neck:** Medium in length, rounded, well muscled, with a slight arc from the base of the skull to the shoulders. Allowances to be made for heavy musculature in adult males.

BODY:

**Torso:** Medium in length, hard and muscular with broad rounded chest and full abdomen as if just finished a meal.

**Legs:** Medium in proportion to the body. Sturdy well muscled with rear legs being slightly longer than the front. Front legs widely set. Females may have slightly finer boning.

**Feet:** Medium in size, oval shape with long slender toes. The paw pads are thick giving the appearance of walking on cushions.

**Tail:** Slender, flexible and long while maintaining proportion to body length. Whip-like, tapering to a fine point.

**Musculature and Boning:** Hard and muscular, not delicate. Medium boning.

COAT/COLOR/PATTERN:

**Length:** Appears hairless. Short fine hair may be present on feet, ears, nose, tail and scrotum. The remainder of the body can range from completely hairless to a covering of down-like fur whose length doesn't interfere with the appearance of hairlessness. Whiskers if present are sparse and very short.
**Texture:** Can be chamois-like to smooth skin. A feeling of resistance may be felt when stroking the skin of some cats. The skin is very wrinkled in kittens. Adults should retain as many wrinkles as possible, especially on the head.

**Color and Pattern:** Any color or pattern genetically possible.

**General Description:**
The Elf is a medium to large size cat with sturdy boning and good muscle development and should have a bit of a belly as if they just finished a meal. Whiskers and eyebrows may be present but sparse. Males can be up to 25 percent larger so long as proper proportions are maintained. The most distinctive features of this cat is its appearance of curled ears and hairlessness, although it is not truly hairless. The skin may be covered with a fine down which is almost imperceptible to both eye and touch. The Elf by nature is very people-oriented and affectionate. They are extremely inquisitive and love to be the center of attention. They are active and alert with gentle and even dispositions.

**Penalize:**
Hair: other than described Delicate or frail appearance. Should not resemble the Oriental body type. Lack of wrinkles on the head. Ears: Abrupt change of direction without smooth curve, pinch, horizontal/vertical crimp, interior surface which appears corrugated. Non-amenable disposition.

**Allowances:** Lockets.

**Disqualify (DQ):**
Any evidence of debilitating, plucking, shaving or clipping or any other means of hair removal. Inability to handle. Kinked or abnormal tail. Extreme curl in adult where tip of ear touches back of ear or head. Ears that are straight, severely mismatched, thick or having inflexible tips. Lack of firm cartilage in base of ear. Ears in which the lower portion of the ear is abnormally flattened, has compressed ridges of cartilage and does not have a normal, visible ear cavity. Inability to handle.
Elf Cats

The Elf cat was founded by three women working together for a common goal. These 3 women were very fundamental in the beginning of the Elf program. Kristen Leedom and Patti Soule are two of these women. Without them the Elf would not be where it is today.

The third woman decided that she had a different goal in her breeding program and has started her own group breeding what they call “Elf Cats.” The only true Elf Cats are bred using only Sphynx, American Curl, and Domestic ancestry. This newly formed group of breeders is using a breed called a Highlander as well as Highland Lynx in their foundation for the Elf Cats.

We have felt the need to add something here about this unacceptable cross of cats because we do not want people who are unsuspecting to be taken advantage of. The original Elf standard was based on two breeds alone and was written to reflect that. The two breeds were sphynx and American Curl. The goal was to produce a hairless cat with a curled ear, of medium to large size, with an impeccable personality. This goal has been achieved with the efforts of many supporting members of our group.

We chose the American Curl for our curled ear cat for very specific reasons. The first reason is that they are a very hearty, healthy, breed of cat and there are no abnormalities associated with their curled ear mutation. The second reason is because we only wanted to use the curled ear mutation along with the hairless mutation as adding more than that could later on cause issues with the health of the breed.

The Highlander and Highland Lynx cats that some people are using in their breeding programs have more genetic mutations including a bobtail which could come from either the bobtail gene or the manx gene but no one is quite sure which one or if it is both as both mutations were used in the creation of the Highland Lynx. Many also have polydactylly which is the addition of extra toes. We do not support the use of these cats in any breeding program because they do not meet the ideal of the standard that was created for the Elf Cats. The Highlander and Highland Lynx are very different cats structurally to the American Curl as well and they will not produce the desired type that we are trying to achieve.

We are just placing this warning to all those interested in the breed for pets or even breeding purposes that the only true elf cats have only ancestry relating back to Sphynx, Dominics (an unrecognized breed registered or otherwise), and American Curls. Please do your research before purchasing a cat that may not be what it was intended. Sure these cats will be hairless and they will have curled ears but, they are not true Elf Cats.
