

Statement of Janet Brown

I have been a member of TICA's Mid Pacific Region and TICA for 22 years. My breeding career started in 2004. I have been breeding Maine Coons ever since, with the cattery name of Whatatrill.

I have been an elected member of the breed committee since 2017. Our first 3 years the committee organized and put on the very first Maine CoonVention in Florida.

The past 3 years have been spent developing and putting in place the new Maine Coon standard. With an emphasis in balance of our beloved breed.

Health has always been an priority in my breeding program. Annual echocardiograms, dna tests, hip xrays and general annual health check are the norm. Preserving and bettering the breed for future generations is my goal.

I show on a pretty regular basis (although slowed down recently to care for my ailing husband).

Thank you in advance for your consideration.

Sincerely,

Janet Brown
